# SHIVAM GUPTA

**Surat, Gujarat, India – 394221**

📞 9512599403 | ✉ shivam.it7062@gmail.com | Github | LinkedIn

## EDUCATION

**University of Gujarat Technological University (GTU)**                    **Sept 2021 - May 2025**
*Bachelor of Technology in Computer Science*                                 *Surat, Gujarat*

## EXPERIENCE

**Zluck Solutions**                                                          **May 2025 - Nov 2025**
*Frontend Developer*                                                         *Onsite*
- Developed dynamic and responsive web applications using React, Redux, and Tailwind CSS for building responsive, user-friendly interfaces.
- Collaborated with team members to build reusable UI components, manage application state efficiently, and ensure smooth user experiences in an agile development environment.

**CodTech Solutions**                                                        **Feb 2025 – Apr 2025**
*Frontend Intern*                                                            *Remote*
- Contributed as a Frontend Developer Intern, working with ReactJS, HTML, CSS, JavaScript, and Bootstrap to build responsive user interfaces.
- Gained basic experience with Node.js, ExpressJS, and MongoDB while collaborating in an agile team to improve performance and user experience.

## PROJECTS

**Portfolio Website**     *Github Link*   *Live Link*
*Technology : React, Tailwind, EmailJS*
- Designed and developed a personal professional portfolio website.
- Showcases projects, skills, education, experiences with responsive, user-friendly design.

**Vidtube**     *Github Link*     *Live Link*
*Technology : React & Redux*
- Vidtube is a video streaming platform inspired by YouTube, built using React.js and YouTube Data API.
- Users can explore trending, search content, and watch videos with a smooth and responsive interface.
- Redux Toolkit is used for state management to ensure scalable and efficient data handling.

**Netflix**     *Github Link*     *Live Link*
*Technology : React, CSS3, Firebase*
- A full-featured Netflix clone developed using React.js, TMDB API, and Firebase Authentication.
- The app supports user signup, login, and logout with secure data handling, along with browsing trending movies and viewing detailed content in a responsive interface.
